

WASHINGTON STATE

Joint Aquatic Resources Permit Application Help & Guidance

US Army Corps
of Engineers
Seattle District

General Resources

epermitting.wa.gov—One-Stop E-Permitting Services

This website can provide you with the most up-to-date forms, guidance documents and contact information.

On-line Permit Assistance System (OPAS)

This online questionnaire asks a series of ‘yes’ or ‘no’ questions to help you determine which permits and approvals may be required for your project. This tool is available at <http://apps.ecy.wa.gov/opas>.

Environmental Permit Handbook

The Environmental Permit Handbook can provide you with an overview for each environmental permit, including contacts and resources for more detailed information. You can view the handbook online or download a copy at <http://apps.ecy.wa.gov/permithandbook>.

Shoreline permits:

Substantial Development: <http://apps.ecy.wa.gov/permithandbook/permitdetail.asp?id=38>

Conditional Use: <http://apps.ecy.wa.gov/permithandbook/permitdetail.asp?id=44>

Variance: <http://apps.ecy.wa.gov/permithandbook/permitdetail.asp?id=45>

Other Local Permits:

Floodplain Development Permit: <http://apps.ecy.wa.gov/permithandbook/permitdetail.asp?id=47>

Washington Department of Fish & Wildlife

Hydraulic Project Approval: <http://apps.ecy.wa.gov/permithandbook/permitdetail.asp?id=25>

Washington Department of Ecology

Section 401 Water Quality Certification: <http://apps.ecy.wa.gov/permithandbook/permitdetail.asp?id=43>

Washington Department of Natural Resources

Aquatic Resources use Authorization (Aquatic Lease):

<http://apps.ecy.wa.gov/permithandbook/permitdetail.asp?id=31>

Department of the Army permits

Section 404 (discharges into waters of the US):

<http://apps.ecy.wa.gov/permithandbook/permitdetail.asp?id=37>

Section 10 (work in navigable waters): <http://apps.ecy.wa.gov/permithandbook/permitdetail.asp?id=36>

United States Coast Guard permits

General Bridge Act Permit: <http://apps.ecy.wa.gov/permithandbook/permitdetail.asp?id=106> Private Aids to Navigation (for non-bridge projects): <http://apps.ecy.wa.gov/permithandbook/permitdetail.asp?id=98>

**Office of Regulatory Assistance
Environmental Permit Information Center**

The Office of Regulatory Assistance Environmental Permit Information Center is a great resource when you have questions about the JARPA form or process. The Center's staff can answer questions about the permits your project may need or provide you with the contact information for staff at local, state, and federal offices that can help you.

The Center is open Monday through Friday from 9:00 am to 4:00 pm. Staff can be reached at 1-800-917-0043 or by email at assistance@ora.wa.gov.

Helpful Hints

Give yourself plenty of time.

It will take some time to gather the information you need to complete the application.

Make sure you fill out the most current version of the JARPA

The most current version is available at <http://www.epermitting.wa.gov>. You can also find up-to-date guidance documents and contact information at this website.

Make sure you have a clear plan in mind for your project.

Just like when you apply for a building permit, you should know what you plan to do before you start to fill out the application. This could include site drawings with dimension, information on impacts and mitigation, etc.

Contact and coordinate with each reviewing agency.

Early coordination with all of the reviewing agencies may prevent delay in the processing of your application. Most agencies will require more information or materials than what is asked for in the JARPA. Early coordination could help agencies identify additional application materials you need to submit for a more efficient project review.

Find out if you can use the JARPA to apply for local Shoreline permits.

Not all cities and counties accept the JARPA for their local Shoreline permits. If you think you will need a local Shoreline permit, contact the local city or county government to make sure they will accept the JARPA.

Find out if your project falls under your local Critical Areas Ordinance or Flood Management program.

You should contact your local city or county government to find out if your project falls under the jurisdiction of your local Critical Areas Ordinance or Flood Management program. If the project is in jurisdiction, check to see if you can use the JARPA to apply for a permit or approval.

General Guidance For The JARPA Form

Part 1–Project Identification

1a. Unique Project Identifier

You need to have a unique project identifier for each project that requires JARPA related permits. This number is used by the regulatory agencies to communicate with each other about your project. Additionally this gives you a single number that you can use to discuss your project with any of the agencies.

To get your unique project identifier, go to www.epermitting.wa.gov or call the Office of Regulatory Assistance at 1-800-917-0043.

1b. Project Name

The Project Name is a unique name for your project that you define to allow you to easily communicate with the regulatory agencies about your project.

Part 2–Applicant

Provide the contact information of the applicant. Usually the “applicant” is the person filling out the application, but in circumstances where a consultant is filling out the application, the applicant would be the party that is legally responsible for the project.

Part 3 – Authorized Agent or Contact

Provide information for the authorized agent or contact.

Applicants may have an authorized agent complete the JARPA form on their behalf. Examples of authorized agents include an environmental consultant or lawyer. A contact is anyone else that can serve as a point of contact instead of the applicant or an authorized agent.

If this is not applicable, write N/A in the space provided.

Part 4–Property Owner

Provide contact information for the property owner but only if different from the applicant. If owner and applicant are the same, please indicate "Same as Applicant" in the space provided.

If there are multiple property owners, please provide the information requested below for each property owner. Please attach an additional sheet to the form necessary.

Part 5–Property and Project Location

5a. Street Address

Please provide the address of the project location. If there is no address, please provide another description such as, highway segment, mileposts, river mile, etc.

5b. City, State, Zip

Please provide the nearest city or town.

5c. County

Please provide the county or counties where the project is located.

5d. Please provide the section, township, and range for the project location.

This information may be located on your property deed. You may also be able to obtain this information from your county assessor’s office. If your project crosses multiple sections, townships or ranges, please list them all. This information is needed to assist the permit reviewers and site inspectors to locate the project.

If you know which Watershed Resource Inventory Area (WRIA) your project is located in, you can locate the section, township and range using the WA Department of Ecology’s WRIA maps, located at <http://www.ecy.wa.gov/services/GIS/maps/wria/townships/trs.htm>.

5e. Please provide the latitude and longitude of the project location?

This information is another way to identify and verify the location of the project. You can obtain your projects latitude and longitude using a Global Positioning Service (GPS) device, a topographic map, or by entering your address at: <http://terraserver-usa.com/>. If applicable, report the latitude and longitude for the ‘center point’ of your project location.

If you know which Watershed Resource Inventory Area (WRIA) your project is located in, you can locate the latitude and longitude using the WA Department of Ecology’s WRIA maps, located at <http://www.ecy.wa.gov/services/GIS/maps/wria/townships/trs.htm>.

The permitting agencies prefer latitude and longitude in the decimal format (47.05061 lat/ -122.84465 long), though most will also accept degree, minutes, seconds (5° 02' 27").

5f. List the tax parcel number(s) for the project location.

Identify the tax parcel number(s) for the project location. If the project location does not have a tax parcel number, for example, a right-of-way, please put N/A in the box.

If you do not know, call the local county assessor’s office.

5g. Identify the type of ownership of the property.

Indicate the type of ownership of the property. This information is used to confirm which regulatory agencies have jurisdiction and what rules and laws may apply.

5h. Contact information for all adjoining property owners, lessees, etc.

Identify the name and mailing address for adjoining property owners, lessees, etc.

5i. Is the project area within a 100-year flood plain?

Is the project area within a 100-year floodplain? Floodplain maps can be located at FEMA’s map center, <http://msc.fema.gov/>.

This information can also be obtained by contacting your city or county government or calling the Office of Regulatory Assistance at 1-800-917-0043.

5j. Briefly describe the vegetation and habitat conditions on the property.

Please provide a brief description of the types of vegetation and habitat on the property (for example, fields, forests, prairie, grass lawn, streams or wetland buffers, etc.), specifically the area in and around the project location.

Detailed information on the project and potential impacts will be asked for in Parts 6, 7, and 8.

5k. Describe how the property is currently being used.

Please describe how the property is currently being used (for example, houses, shopping center, farming, undeveloped, etc.). How long has the current use been in place?

5l. Describe how the adjacent properties are currently being used.

Please describe the current use(s) of the adjacent properties (for example, houses, shopping center, farming, undeveloped, etc.). How long have those current uses been in place?

5m. Describe the structures (whether above or below ground) currently located on the property, including its purpose.

Identify any man-made structures on the property. For example, parking lots, buildings, storage tanks, debris, concrete foundations, culverts, roadways (gravel, asphalt, etc.), bridges, dock, pier, etc.

5n. Provide driving directions, from the closest major highway, to the project location, and attach a map.

Please provide driving directions to the project location from the closest major highway. If you have a map of the project location, please attach it to your application.

Part 6–Project Description

6a. Provide a very brief description of the overall project.

Please provide a brief overview of the project proposal. More detailed information will be asked for in the next few parts.

6b. What is your project category?

Please check the box(es) for the category that best describes your project.

6c. Please indicate the major elements of your project.

Please indicate the major elements of your project. Check all that apply and list any additional major elements under “Other”.

6d. Please describe how you plan to construct each project element checked in 6c. Include specific construction methods and equipment that will be used.

For each of the major elements that you have checked in 6c, please provide detail of how you propose to construct them. Include detail about how the construction methods and techniques to reduce the impact to the natural environment (e.g. silt fences, tarps, water diversion, bubble curtains, etc.). List any staging areas and equipment that will be used. Please be as specific as possible.

Make sure to identify where each element will occur in relation to the nearest waterbody. Also indicate whether each activity is within the 100-year floodplain.

If your activities will occur at different times or in phases describe which activities will occur during which timeframes.

6e. What are the proposed start and end dates for the construction of the project?

Please indicate your best estimates of the overall start and end dates for the project. If the project activities will be completed during multiple timeframes, please indicate the start and end of each phase and which activities are included.

6f. Describe the purpose of the proposed work and why you want or need to perform it.

Explain why the proposed activity is necessary or desired.

This is an opportunity for you to discuss the needs and/or challenges of the project described in this application. Please describe any project alternatives that were considered and any project modifications that may have resulted from discussions with resource agency staff. Please attach additional sheets to the application if necessary.

6g. Fair market value of the project, including materials, labor, machine rentals, etc.

Provide the estimated cost of your project. In your estimate, include materials, value of paid or volunteered labor and equipment.

6h. Will any portion of the project receive federal funding?

If any portion of the project, including planning and design, is funded by federal money, check “yes”. This could include direct funding, grants or loans. If yes, please indicate which federal agencies or programs are providing the funding.

This information is used to determine the federal agency that is responsible for compliance with the endangered species act and federal other regulations.

6i. Compliance with the State Environmental Policy Act (SEPA)

The State Environmental Policy Act (SEPA) environmental review is usually started early in the application process. This review involves filling out an environmental checklist that helps you to determine if significant impacts are caused by your proposal.

Usually county or city government staff can work with you to make an initial evaluation whether the impacts are significant or not.

If your project has a National Environmental Policy Act (NEPA) document that has been adopted by the lead agency for SEPA compliance, please mark the box to indicate a SEPA decision letter is attached and attach the Notice of Adoption letter to your application.

If you have not started the SEPA review process, please contact your local government or go to www.epermitting.wa.gov for more information about this process, the checklist and forms.

Part 7–Wetlands: Impacts and Mitigation

7a. Will the project impact wetland buffers?

Indicate whether your project will or could impact wetland buffers. Impacts to buffers can happen from activities that occur within a wetland buffer, wetland or some distance away (e.g. filling, excavating, draining, clearing vegetation, etc.). If you may have wetland buffer impacts, please describe the impacts, including type, amount, and duration in Question 7h.

For more information about wetland regulations and the Clean Water Act go to: http://www.epa.gov/owow/wetlands/pdf/reg_authority_pr.pdf

7b. Will the project impact wetlands?

Indicate whether your project will or could impact wetlands. Impacts to wetlands can happen from activities that occur within a wetland or some distance away (e.g. filling, excavating, draining, clearing vegetation, etc.). If you may have wetland impacts, please describe the impacts, including type, amount, and duration in Question 7h.

For more information about wetland regulations and the Clean Water Act go to:
http://www.epa.gov/owow/wetlands/pdf/reg_authority_pr.pdf

7c. Describe how the project has been designed to avoid and minimize adverse impacts to wetlands.

Please describe the ways your project is designed to avoid or reduce the impacts to wetlands. Include whether the placement of the project was selected to reduce impacts, and how the construction was modified to reduce or avoid impacts.

7d. If you have already worked with any government agencies to reduce or avoid impacts, please list them below.

List and contacts that you have had with city, county, state and federal agencies as part of preparing your application or determining your site and construction activities.

7e. Has a wetland delineation report been prepared?

Wetland delineation is a process for determining the boundary of a wetland in a certain location. This information is used to help determine accurate wetland boundaries and jurisdiction. It is also used to help determine the extent of the impacts to the wetland from proposed construction activities.

For more information wetland delineation reports, go to the Washington State Wetlands Identification and Delineation Manual at <http://www.ecy.wa.gov/biblio/9694.html> and US Army Corps of Engineer's Wetlands Delineation Manual at:
http://www.nws.scace.army.mil/PublicMenu/Documents/REG/87_Manual.pdf

7f. Have the wetlands been rated using the Washington State Wetland Rating System?

The rating system categorizes wetlands into four categories based upon wetland functions, sensitivity to disturbance, rarity and/or the ability to replace them. There are separate rating systems for wetlands located in Eastern Washington and wetlands located in Western Washington.

For more information about rating wetlands, go to:
<http://www.ecy.wa.gov/programs/sea/wetlands/ratingsystems/index.html>

7g. Have you prepared a mitigation plan to compensate for the project’s adverse impacts to wetlands?

A mitigation plan is a description of the additional activities you propose to compensate for adverse impacts to wetlands. These activities may include onsite or offsite creation of additional wetlands, restoration or enhancement of wetlands, or preservation of wetlands.

For guidance on creating a mitigation plan, go refer to Wetland Mitigation in Washington State Part 1&2 Guidance located at:

<http://www.ecy.wa.gov/programs/sea/wetlands/mitigation/guidance/index.html>

7h. For each project activity that will adversely impact wetlands, list the type and rating of each wetland to be impacted, the extent and duration of the impact, and the type and amount of compensatory mitigation proposed. If you are submitting a compensatory mitigation plan that includes a similar table, you may simply state (below) the page number in the mitigation plan where this information can be found.

Please list the proposed activities causing impacts and mitigation for those impacts in the summary table. Include information on the activity causing impact (excavation, fill, etc.) wetland type (based on the Western Washington/Eastern Washington wetland rating system), how much area (square feet or acres) will be impacted, duration of impact (temporary, permanent) as well as what type of mitigation is proposed (creation, restoration, etc.) and how many acres of mitigation will be provided.

If a table or chart containing this information is available in your mitigation plan, you can list the page number where the table or chart can be found.

7i. Provide a summary of what the compensatory mitigation plan is intended to accomplish, and describe how a watershed approach was used to design the plan.

Please provide a brief summary of the activities you are proposing to compensate for impacts to wetlands. Include information on what the mitigation plan intends to accomplish. Also describe how a watershed approach was used to design the plan.

7j. For all filling activities identified in 7h, please describe, in detail, the source and nature of the fill material, the amount that would be used, and how and where it would be placed into the wetland.

If you have any activities that involve “filling-in” wetlands, please describe the material being used, including the type, source, and amount of material (e.g. 3 cubic yards of dirt from the upland staging area). Also indicate where and how it will be placed in the wetland (e.g. fill placed in the western edge using a backhoe).

7k. For all excavating activities identified in 7h, please describe the type of material proposed to be excavated, the methods to be used, the amount of material to be removed and where the material will be disposed.

If you have any activities that involve excavating in a wetland, please describe what type of material you will be removing, what method or equipment will be used for removing it, how much you will be removing and where you will place the removed material. (e.g. I will be using a backhoe to remove approximately 2 cubic yards of dirt and vegetation and placing it along the access road.)

Part 8 – Waterbodies (other than wetlands): Impacts and Mitigation

8a. Will your project impact a waterbody or the area around a waterbody?

Waterbodies include rivers, lakes, streams, creeks, seasonally dry river beds, ponds, bays, etc. Impacts could occur from activities that take place in these waterbodies or some distance away.

If you are unsure as to whether your activities could impact waterbodies please call the Office of Regulatory Assistance at 1-800-917-0043.

8b. Summarize the impact(s) to each waterbody in the following table

Please list each activity causing impact, the waterbody, and the details of the impact, including duration, location, amount of impact (e.g. material placed or removed) and the portion of the waterbody that will be affected.

8c. Describe how the project has been designed to avoid and minimize adverse impacts to the aquatic environment.

Please describe the ways your project is designed to avoid or reduce the impacts to the aquatic environment. Include whether the placement of the project was selected to reduce impacts, and how the construction was modified to reduce or avoid impacts.

In addition to the summary, please attach plans and specifications for activities designed to protect fish life (e.g. fish rearing pools, creation of spawning areas, addition of large woody debris, etc.).

8d. Have you prepared a mitigation plan to compensate for the project's adverse impacts to non-wetland waterbodies?

A mitigation plan is a description of the additional activities you propose to compensate for adverse impacts to the aquatic environment.

8e. Provide a summary of what the compensatory mitigation plan is intended to accomplish, and describe how a watershed approach was used to design the plan. If you have already completed 7i, you do not need to restate your answer here.

Please provide a brief summary of the activities you are proposing to compensate for impacts to non-wetland waterbodies. Include information on what the mitigation plan intends to accomplish. Also describe how a watershed approach was used to design the plan.

8f. Please describe in detail the source and nature of the fill material, the amount that would be used, and how and where it would be placed into the waterbody.

If you have any activities that involve “filling-in” portions of waterbodies, please describe the material being used, including the type, source, and the amount of material (e.g. 3 cubic yards of dirt from the upland staging area). Also indicate where and how it will be placed in the waterbody (e.g. fill placed on the western bank using a backhoe).

8g. For excavating or dredging impacts, please describe the type of material proposed to be excavated or dredged, the methods to be used, the amount of material to be removed and where the material will be disposed

If you have any activities that involve excavating or dredging in a waterbody, please describe what type of material you will be removing, what method or equipment will be used for removing it, how much you will be removing, and where you will place the removed material. (e.g. I will be using a backhoe to remove approximately 2 cubic yards of sand and rocks and placing it along the access road.)

Part 9–Additional Information

9a. What is the zoning designation for the project location?

If you know the current zoning information for the property(s) where the work will occur, please indicate the zoning designation below (e.g. residential, rural, agricultural, general commercial, etc.). This information can be obtained from your city or county planning department.

9b. What is the USGS national Hydrological Unit Code (HUC) that the project is in?

If you know the United State Geological Survey (USGS) national Hydrological Unit Code (HUC) that the project is occurring in, please list it below. These codes are based upon watersheds and help determine the resources that are important in the project area.

For more information and to determine your HUC, visit <http://cfpub.epa.gov/surf/locate/index.cfm>

9c. What Water Resource Inventory Area Number (WRIA #) is the project in?

If you know the Water Resource Inventory Area number (WRIA) that your project is occurring within, please provide it below. The WRIA number is based upon watersheds and helps determine the resources that are important in the project area.

You can find out what your WRIA number is by going to:

<http://www.ecy.wa.gov/services/gis/maps/wria/wria.htm>

9d. Are any of the waterbodies identified in 7h or 8b above on the Ecology 303(d) List?

If you know whether the waterbodies that you propose to impact are on the current 303d list, please indicate below and provide the parameters of the 303d listing. The 303d list is a designation of the current conditions of a waterbody including the existing problems and pollutants that the waterbody may contain.

You can find out whether the waterbodies are on the 303d list by going to:

<http://www.ecy.wa.gov/programs/wq/303d/>

9e. For in-water construction work, will the project comply with the State of Washington water quality standards for turbidity ([WAC 173-201A](#))?

If you know whether your project impacts will comply with the State of Washington water quality standards for turbidity (suspended sediments in water) please indicate below. ~~If your project will not meet these standards, indicate whether you are requesting a short-term water quality modification.~~ You can also read more about these standards by going to:

<http://www.ecy.wa.gov/programs/wq/swqs/index.html>

If you are unsure as to whether you are complying with these laws please call the Office of Regulatory Assistance Information Center at 1-800-917-0043.

9f. If within the jurisdiction of the Shoreline Management Act, what is the local shoreline environment designation?

If you know whether your project location is within jurisdiction of the Shoreline Management Act, please indicate the local shoreline designation. This is usually when your project is occurring within 200ft of a waterbody or within the 100-year flood plain.

You can find the information by contacting your city or county planning department.

9g. What is the Department of Natural Resources Water Type? *Check all that apply.*

If you know the Department of Natural Resources Water Type classification, please indicate it below. You can find out more about water types and obtain the water type for the waterbodies that your project may be impacting by going to:

http://www.dnr.wa.gov/BusinessPermits/Topics/ForestPracticesApplications/Pages/fp_watertyping.aspx

9h. Will this project be designed to meet WA Dept. of Ecology’s most current stormwater manual?

If you know whether the proposed project is designed to meet Department of Ecology’s most recent stormwater manual, please indicate that below. If no, indicate whether you are following a different manual approved by the Department of Ecology. The stormwater manual is a set of guidance about how to design and maintain stormwater controls, including the control of runoff, stormwater holding ponds, etc.

For more information on Ecology’s stormwater manual, please visit <http://www.ecy.wa.gov/programs/wq/stormwater/tech.html>

9i. If you have any historical knowledge of what the property has been used for before identifying it for this project please tell us.

If you have any historical knowledge of the property please indicate that below. Include any previous land uses or previous states of the natural environment (e.g. used to be a dairy farm, a gas station was here 20 years ago, it was forested until 30 years ago, etc.).

9j. Has a cultural resource survey been conducted on the project area?

If a cultural resource survey has been conducted on the project area, please include a copy of the report with your application.

Mailing Addresses and Contact Information

Shoreline permits Send to: Appropriate city or county planning, building, or community development department. <ul style="list-style-type: none">For city and county contact information go to: http://www.ora.wa.gov/today.asp#resources		
Hydraulic Project Approval Send to: Department of Fish and Wildlife
